

MVI Multi-View Incorporated

B E N C H M A R K I N G

The Benchmarking Application (BA) Download Instructions:

(It is recommended to first uninstall previous versions by going to Start/Programs/MVI Benchmarking and Uninstall)

1. CLICK HERE for a "print friendly" version of these instructions for reference and select the **Download** button
2. Select "**Save**" on the File Download Window
3. Choose **Desktop** as the location for the Save As window
4. Double-click the "**BA Install X.X.exe**" zip file on your desktop and select **Unzip**
5. Open the newly created "**BA Install X.X**" folder on your desktop and select "**setup_MVI_Full_X.exe**"
6. Follow the installation instructions leaving all defaults. *(Note: if installed previously, uninstall the previous version first and select "REPAIR" during both the VFP9 and the MyODBC Setup process.)*
7. Select the "**BA by MVIB**" butterfly icon on your desktop
8. The default ID of DEMO will allow you to run the **Benchmarking Application (BA)** against Demonstration data. After your first Upload is processed to the Master Data Set you may run the BA for real time comparison.

Note: Both the BA Install X.X zip file and folder may be deleted after the installation. The great majority of installation issues pertain to Firewall settings and user rights.
